Camera Assembly Test Rubric

Student Name: **Date:**

Criteria	Level 1 (5pts)	Level 2 (7pts)	Level 3 (8pts)	Level 4 (10 pts)
Removing and Checking All Elements (Camera body, lens, microphone, battery, SD card)	Identifies and removes some parts with frequent errors or missing steps. Does not fully check for damage or battery/SD card status.	Identifies and removes most parts with some guidance. Checks some elements but misses details (e.g., battery level or SD card).	Correctly identifies and removes all parts independently, checking each element for readiness and condition.	Quickly and confidently identifies and removes all elements, thoroughly checking each item for functionality and readiness.
Attaching Lens	Attaches lens with significant difficulty, possibly forcing parts or risking damage.	Attaches lens with some mistakes, may need prompting to align correctly.	Attaches lens smoothly and correctly without risk of damage.	Attaches lens precisely and confidently, demonstrating clear care and proper technique.
Attaching Microphone	Attaches microphone incorrectly or incompletely; cable placement is poor, creating interference or	Attaches microphone with some errors, such as loose connection or poor positioning.	Attaches microphone correctly and securely, with proper cable placement.	Attaches microphone flawlessly, showing awareness of audio setup and excellent cable management.

	risk of damage.			
Setting Up and Holding Camera for Filming	Holds camera unsafely or awkwardly; set-up does not consider balance, stability, or proper framing.	Holds camera with basic stability, but some movements or positioning are unsteady.	Holds and positions camera safely and effectively, demonstrating understanding of framing and balance.	Demonstrates professional-level handling, including smooth movement, stable grip, and attention to framing and ergonomics.
Disassembly and Storage	Disassembles equipment incorrectly, leaving items at risk of damage or stored improperly.	Disassembles most equipment correctly but may forget steps or leave parts unsecured.	Disassembles and stores equipment correctly and safely, following standard procedures.	Disassembles efficiently and with exceptional care, ensuring all components are perfectly stored and protected.
Overall Safety and Caution with Equipment	Shows little awareness of safety, frequently handling equipment carelessly.	Shows some awareness of safety, but occasionally handles equipment roughly or risks damage.	Consistently demonstrates careful and safe handling, avoiding unnecessary risks.	Demonstrates excellent caution and respect for equipment, modeling best practices for others.

Final score: /60
