What makes a good public space?

Courtyard Design Project Overview

TDA 3/4M
Architectural Design
March 2023

MONTRÉAL
How Public Space Transforms a City

Project description

The Holy Names courtyard is in desperate need of a redesign. This is a crucial public space at our school that is currently being underutilized.

There is a lot of potential with this space, and administration has mentioned that there may money available for an infrastructure project.

Project description

This is where you come in. Your job is to think like an architect and come up with a design proposal for the courtyard.

This will require that you conduct a site analysis and research, draw sketches and plans, create a 3D model, and present your proposal to the client.

Stage 1:
Site analysis

- Measure the space
- Take photos of area
- Create rough site plan sketch

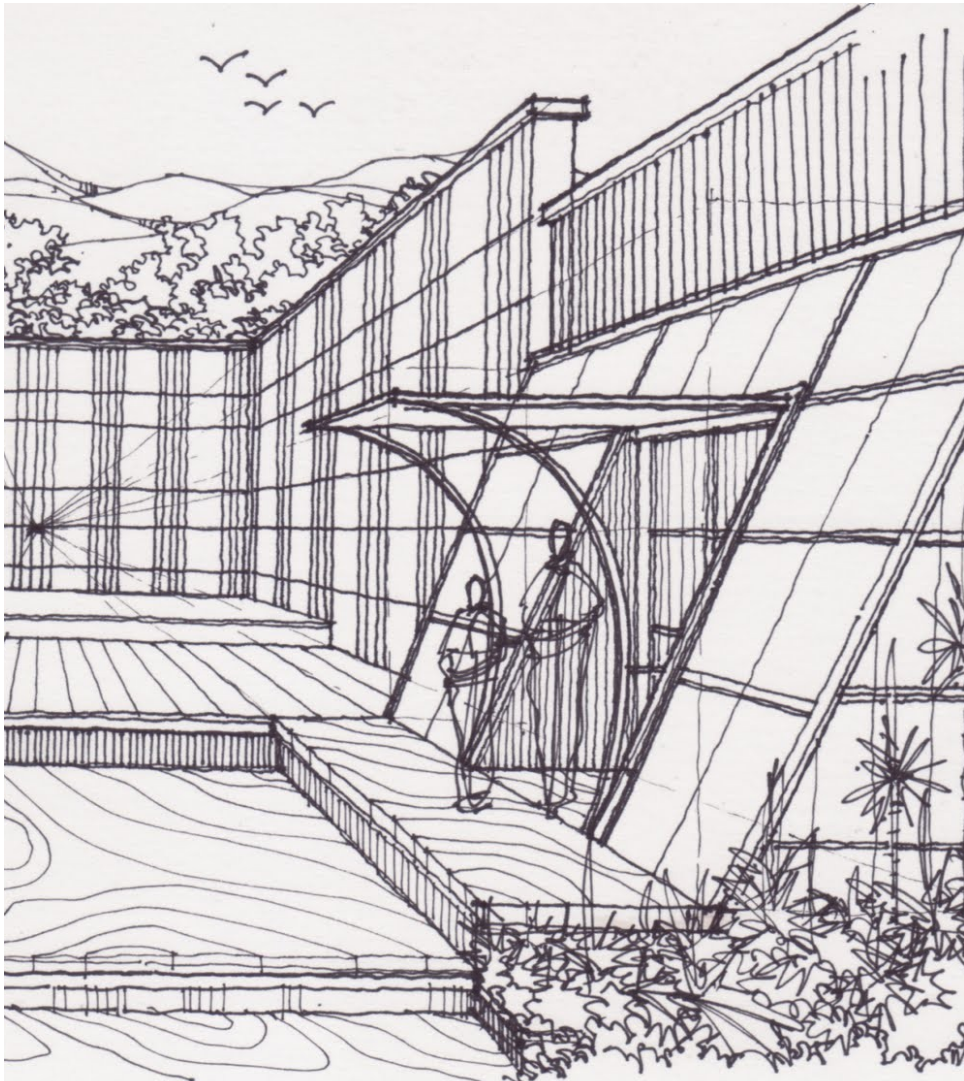

Stage 2: Research and brainstorm

- Research your site to determine its properties and community needs
- Research other public architecture projects for inspiration and direction

Stage 3: Sketches

- Create scaled sketches of the site/floor plan
- Come up with rough concept sketches in 3D perspectives

Stage 4:
3D Model

- Use SketchUp to create a 3D model of your design
- Should incorporate the skills and best practice learned in the SketchUp tutorial

Stage 5: Presentation

- Create an architectural presentation board to showcase your project
- Can use Canva, Google Drawings/Slides, Photoshop, etc.

Activity: Site Analysis

We will conduct the first stage of the assignment together as a class. In groups of four, you will collect data about the courtyard that you will need for the next stages. Your goal is to take measurements, draw a rough sketch of the site plan, and take photos.
