Designing Games for Impact

Criterion A: Inquiring and Analysing

Grade 7 MYP Design
International College Spain

Name:

Write name here

KEY CONCEPT: Communities

RELATED CONCEPTS: Adaptation & Innovation

GLOBAL CONTEXT: Fairness & Development

STATEMENT OF INQUIRY:
Designers can adapt and innovate experiences which can promote social justice within communities, through interactive technological solutions that explore fairness and development.

INQUIRY QUESTIONS:

FACTUAL

What are some of the most common social justice issues children face?

What tools are used to design interactive web games?

CONCEPTUAL How can designers use their skills to raise awareness about social justice issues?
Why is it important to understand the innerworkings of the technologies we interact with?

DEBATABLE

Which social justice issue is most important?

Can video games be used in an educational way?

ATL: SOCIAL SKILLS

DESIGN SITUATION

You are a game designer that works for a company that makes free interactive video games for the web. Your boss has recently approached you about a meeting he just had with principals from international schools across Europe. In the meeting, these schools said they noticed that a lot of their students spend their free time using school laptops to play video games on the web. Rather than trying to fight this, they have decided that they want to design some educational games that raise awareness about social justice issues facing school-aged children. The hope is that this makes their students more caring and internationally-minded.

This is where you come in. Your boss has asked you to be the lead designer one of these games. You job is to design and create an interactive game for the web that uses block coding to raise awareness about a social justice issue of your choice. You have been tasked with conducting research about social justice issues impacting children and selecting one issue that you will cover in your game. The overall goal of your game should teach your target audience about the social issue in a fun an interactive way.

Visit **this page** to learn more about some of the social justice issues children face.

G	Goal	To create an interactive web game that raises awareness about a social justice issue
R	Role	A game designer at a company that makes interactive web games
A	Audience	Children between the ages of 5 and 18
S	Scenario	Your company wants to create a game that can be used in a school environment to educate children about important social justice issues.
P	Product	An interactive web game built with block coding
S	Success Criteria	MYP Assessment Criteria A, B, C and D.

Criterion A Mark Scheme

Strands	Slides	0	1-2	3-4	5-6	7-8
i. explain and justify the need for a solution to a problem	**4**	The student does not reach a standard described by any of the descriptors	states the need for a solution to a problem	outlines the need for a solution to a problem	explains the need for a solution to a problem	explains and justifies the need for a solution to a problem
ii. state and prioritize the main points of research needed to develop a solution to the problem	**5** **6** **7** **8** **9**	The student does not reach a standard described by any of the descriptors		states some points of research needed to develop a solution, with some guidance	states and prioritizes the main points of research needed to develop a solution to the problem, with some guidance	states and prioritizes the main points of research needed to develop a solution to the problem, with minimal guidance
iii. describe the main features of one existing product that inspires a solution to the problem	**6**	The student does not reach a standard described by any of the descriptors		states the main features of an existing product that inspires a solution to the problem	outlines the main features of an existing product that inspires a solution to the problem	describes the main features of an existing product that inspires a solution to the problem
iv. present the main findings of relevant research	**10**	The student does not reach a standard described by any of the descriptors	states the findings of research	outlines some of the main findings of research	outlines the main findings of relevant research	presents the main findings of relevant research

Design Situation

What is social justice? What does it mean to you?

Social justice is...

What do you think are some of the most common social justice issues impacting children?

I think...

Do social justice issues impact all children the same? Why or why not?

I think...

Why do you think it is important to raise awareness about social justice issues amongst school-aged children?

It is important to raise awareness about social justice issues because...

Describe who would need/want/use these different products?	
https://www.safekidgames.com/alien-addition/	https://littlealchemy2.com/
Why would they need/want/use these products?	
Which target audience would you prefer to create your product for and why? Be specific about age and location.	

Design Situation: Trend Board

Do some independent research about popular educational web games. Copy and paste at least five images of different monuments and include a one or two sentence description about each one.

Research Plan

WHAT DO I NEED TO KNOW?	WHY DO I NEED TO KNOW THIS?	HOW AM I GOING TO DO THIS?	TYPE OF RESEARCH	PRIORITY
What are some of the most common social justice issues that children face?				
What social justice issues are important for my client to know about?				
What are some design features of existing educational video games catered to my target audience?				
How do I use block coding to design an interactive web game?				

Research: Client Interview

QUESTION	ANSWER	WHAT DOES THAT ANSWER MEAN?

Research: Social Justice Issues

NAME OF THE ISSUE	WHAT IS IT ABOUT?

Which social justice issue do you think is most important and why? Choose one that you will explore in your game and describe here why you think it's important to raise awareness about this issue.

Write your answer here...

Research: Your Social Justice Issue

What is your issue and what are the consequences?	
How many children does it impact?	
Where does it impact children most?	
What are three facts that you think are important for people to know about it?	
What action can be taken to address this issue?

What are some important things you learned about game design and block coding in these tutorials?	

Research Review

SLIDE	WHAT DID I LEARN?	WHY IS IT IMPORTANT?	HOW MIGHT IT BE USED?

Design Brief

1. Design Problem:

What is the “problem” you are trying to solve? What is the design situation and your role within it? (2 sentences)

2. Intended Client:

Who are you designing your solution for? What are their characteristics? (2 sentences)

3. Description of Current Market:

What products are currently on the market? Summarize your findings from your Existing Design Analysis (4-5 sentences).

4. Limitations:

What might prevent you from designing the game that you want to? (2 sentences)

Criterion B Mark Scheme

Strands	Slides	0	1-2	3-4	5-6	7-8
i. develop a list of success criteria for the solution	**4**	The student does not reach a standard described by any of the descriptors	states one basic success criterion for a solution	states a few success criteria for the solution	develops a few success criteria for the solution	develops a list of success criteria for the solution
ii. present feasible design ideas, which can be correctly interpreted by others	**5** **6** **7** **8** **9**	The student does not reach a standard described by any of the descriptors	presents one design idea, which can be interpreted by others	presents more than one design idea, using an appropriate medium(s) or labels key features, which can be interpreted by others	presents a few feasible design ideas, using an appropriate medium(s) and labels key features, which can be interpreted by others	presents feasible design ideas, using an appropriate medium(s) and outlines the key features, which can be correctly interpreted by others
iii. present the chosen design	**10**	The student does not reach a standard described by any of the descriptors		states the key features of the chosen design	presents the chosen design stating the key features	presents the chosen design describing the key features
iv. create a planning drawing/diagram which outlines the main details for making the chosen solution	**11**	The student does not reach a standard described by any of the descriptors	creates an incomplete planning drawing/ diagram	creates a planning drawing/diagram or lists requirements for the creation of the chosen solution	creates a planning drawing/diagram and lists the main details for the creation of the chosen solution	creates a planning drawing/diagram, which outlines the main details for making the chosen solution
