COMMUNICATIONS TECHNOLOGY / TECHNOLOGICAL DESIGN / TEACHER EDUCATION

Professional Profile

Ontario Certified Teacher and adult educator with an M.Ed. in Adult Education, a B.Ed. in Technological Education, and nearly four academic years of secondary teaching in Ontario and an international IB school. OCT-qualified in two broad-based technology subjects, Communications Technology and Technological Design (Grades 9–12), with Grade 11 and 12 teaching experience in both. Brings 14 years of educational technology, curriculum development and professional-learning experience across school, university and healthcare settings, including associate teaching, faculty development, live virtual facilitation, LMS leadership and accessible course design. Brings a multimedia production and communication studies background to senior Communications Technology instruction, alongside design-process teaching in Technological Design, robotics and architecture.

Core Alignment

- **Technological Education curriculum and pedagogy:** Grades 9–12 Communications Technology and Technological Design, Exploring Technologies, architecture, robotics, STEM and MYP Design, including safety curriculum planning and safety demonstrations.
- **Teacher and adult development:** associate teaching, mentoring, evaluation and growth-oriented feedback, professional learning facilitation, curriculum collaboration and reflective practice.
- **Online and blended learning:** live virtual facilitation, asynchronous eLearning, blended program design, learning management systems and accessible digital learning.
- **Educational technology:** TPACK-informed technology integration, digital media production, LMS administration, eLearning authoring, digital literacies and responsible uses of AI in learning.
- **Inclusive practice and sensitive topics:** ELL-responsive teaching, AODA/WCAG accessibility, differentiated supports, and suicide crisis response education developed with people with lived experience.

OCT Qualifications

- Ontario College of Teachers | Registration 727521 Active
- Communications Technology (broad-based technology), Grades 9 and 10; Grades 11 and 12 2022
- Technological Design (broad-based technology), Grades 9 and 10; Grades 11 and 12 2024
- Teaching English Language Learners, Part 1 2025
- New Teacher Induction Program 2023

Secondary Technological Education and Teacher Development

Technological Education Teacher Windsor-Essex Catholic District School Board, Windsor, ON — 2022–2024; Sep–Dec 2025

- Taught Grades 9–12 Communications Technology and Technological Design, including Grade 11 and 12 courses in each school year, as well as Exploring Technologies, Civics and Career Studies.
- Designed project-based courses, assignments and assessments connecting Ontario curriculum expectations with practical technical, design and media work.
- Planned safety curricula and led safety demonstrations for Technological Education students.
- Served as associate teacher for a Communications Technology teacher candidate in a formal practicum placement (Oct–Dec 2025), hosting, supervising, mentoring and evaluating the candidate.
- Adapted instruction and assessment in a school where approximately 75% of students were English language learners.
- Delivered professional development to 25–30 teaching colleagues on educational technology and eLearning strategies for classroom practice.
- At Holy Names Catholic High School, taught architecture, Technological Design, Robotics, STEM and Exploring Technologies and supported the robotics team.

MYP Design Teacher International College Spain, Madrid, Spain — 2024–2025 academic year

- Taught MYP Design to Grades 6–10 in an international IB school, guiding students through investigation, planning, creation, testing and reflection.
- Adapted curriculum, assessment and classroom practice for a multilingual, internationally diverse school context.

Adult Education, Curriculum and Educational Technology

Education Specialist Centre for Addiction and Mental Health, Toronto, ON — Feb 2026–Present

- Lead instructional design for a seven-module national learning program for 9-8-8 Suicide Crisis Helpline responders, combining asynchronous eLearning with synchronous practice and simulation.
- Contribute to training strategy, needs assessment and curriculum mapping for the 9-8-8 education and training team.
- Translate research, professional competencies and operational requirements into curriculum, scenarios, simulations, practice activities and job aids for adult professional learners.
- Facilitate live virtual sessions for adult professional audiences.
- Conduct literature reviews and collaborate with clinical experts, frontline professionals and people with lived experience through a 20-member advisory working group.
- Contribute to the evaluation of emerging learning technologies, including responsible uses of AI that maintain human review, approved content and attention to learner needs.

Instructional Designer, Freelance McMaster University School of Nursing & Women's College Hospital — 2017–2025

- Designed and developed 30+ interactive online modules for healthcare professionals across provincial and national initiatives.
- Translated evidence and subject-matter expertise into scenario-based and case-driven learning using Articulate Storyline and Rise.
- Applied adult-learning principles and AODA/WCAG accessibility standards to complex professional education.

Senior Digital Education Specialist Unity Health Toronto, Toronto, ON — 2017–2022

- Partnered with clinical and professional education teams to identify learning needs and develop online and blended education for a 10,000+ employee organization.
- Administered Moodle and led a multi-year LMS migration; designed end-user learning for major organizational technology implementations.
- Provided day-to-day direction to four LMS administrators and eLearning developers and mentored staff in their professional growth.
- Used learner feedback and evaluation data to guide follow-up education and program improvement.

Educational Technology Consultant & LMS Administrator Western University, London, ON — 2012–2017

- Trained 100+ university faculty members on integrating educational technologies into teaching, through in-person workshops and live virtual sessions.
- Created and maintained online course environments and multimedia learning resources supporting 7,500+ students and approximately 1,200 courses during an LMS transition.
- Led eLearning professionals on a provincially funded project producing 12 online modules focused on student competency development.

Additional Adult Teaching

- Taught computer skills and media literacy to older adults and facilitated chess instruction for adult learners in a public-library setting.

Education

Master of Education (M.Ed.), Adult Education University of Toronto — 2022

- Major research paper examined the intersection of e-learning technology and adult learning theories.

Bachelor of Education (B.Ed.), Technological Education University of Windsor — 2023

Bachelor of Arts (Honours), Communication Studies Western University — 2014

Diploma, Multimedia Production Fanshawe College — 2013
