Monumental Design

Criterion A: Inquiring and Analysing

Grade 6 MYP Design
International College Spain

Name:

Write name here

KEY CONCEPT: Communication

RELATED CONCEPTS: Function & Form

GLOBAL CONTEXT: Orientation in Space and Time

STATEMENT OF INQUIRY:
Designers can influence the form and function of public structures in order to to communicate important messages that help us not repeat past mistakes.

INQUIRY QUESTIONS:

FACTUAL

Who is represented in memorials and monuments? Who is not represented?

What tools can we use to design 3D structures?

CONCEPTUAL How can designers use their skills to raise awareness about important historical lessons?
How can a designer shape the way their target audience feels about their work?

DEBATABLE

Should we be passive when interacting with memorials and monuments?

Should we just forget the past and move on?

ATL: SOCIAL SKILLS

DESIGN SITUATION

Your town has received a large grant to build a public monuments. The town planners and mayor have no idea what they want it to look like, or what is should commemorate, so they have decided to hold a competition and let the residents choose a winner.

You need to submit a proposal, along with a model, to win the chance of your monument being built.

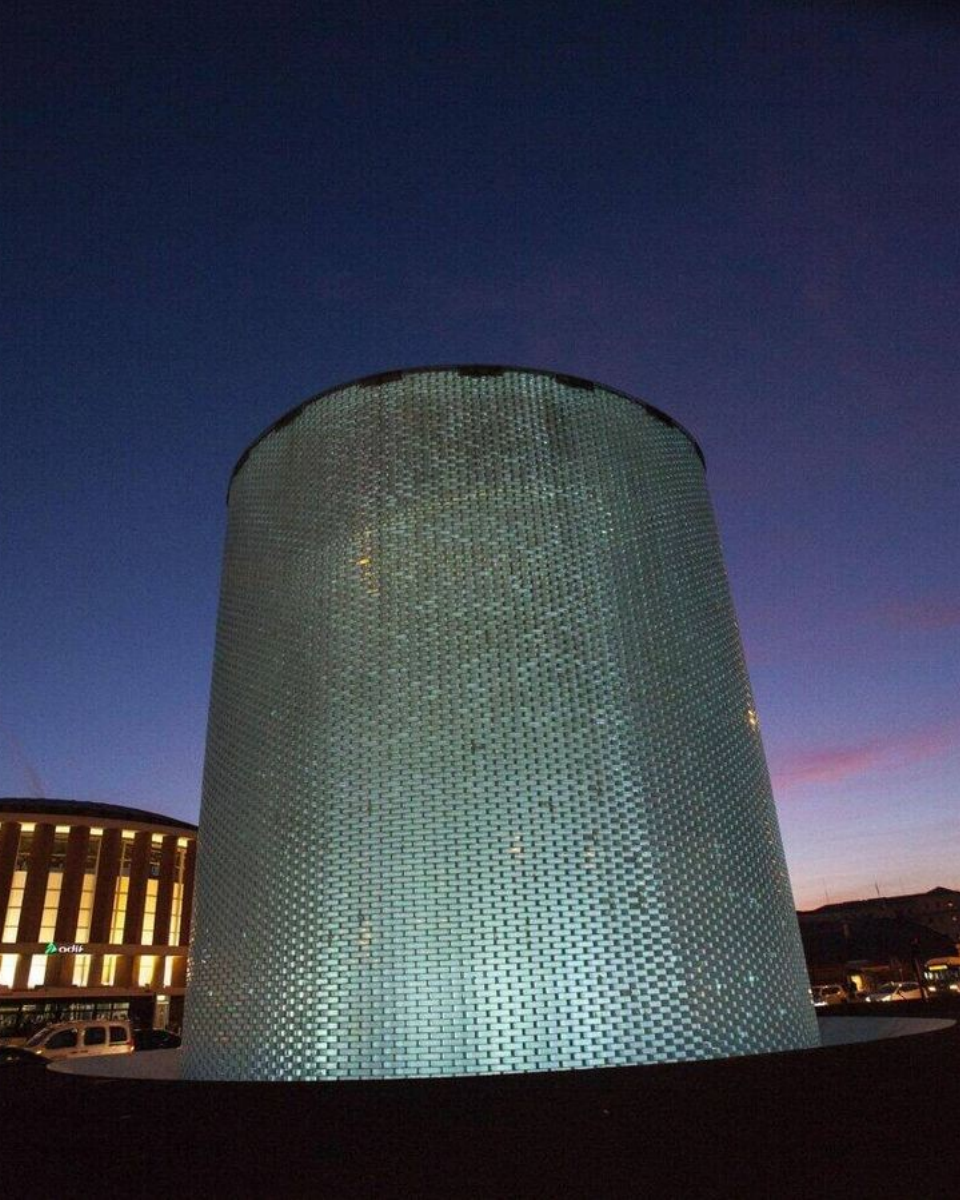

You might choose to commemorate someone you think is important who is not currently celebrated. You might even think about a monument in your own town that you think needs to be taken down and replaced.

For this project, you will be designing an idea three-dimensional sculptural monument. However, you will of course not be designing a full-sized monument. Instead, you will be making a smaller model called a maquette.

G	Goal	To produce a high-quality maquette that will win the town monument competition and will be made into a full-size monument.
R	Role	Resident and designer
A	Audience	A judging panel made up of the mayor, town planners, town representatives and residents
S	Scenario	The town recently got a grant to build a monument and is seeking public submissions. You can choose the town where you live, a town where you have lived or where your family is from, or somewhere else that is important to you.
P	Product	A maquette, along with a short written or audio explanation or guide.
S	Success Criteria	MYP Assessment Criteria A, B, C and D.

Criterion A Mark Scheme

Strands	Slides	0	1-2	3-4	5-6	7-8
i. explain and justify the need for a solution to a problem	**4**	The student does not reach a standard described by any of the descriptors	states the need for a solution to a problem	outlines the need for a solution to a problem	explains the need for a solution to a problem	explains and justifies the need for a solution to a problem
ii. state and prioritize the main points of research needed to develop a solution to the problem	**5** **6** **7** **8** **9**	The student does not reach a standard described by any of the descriptors		states some points of research needed to develop a solution, with some guidance	states and prioritizes the main points of research needed to develop a solution to the problem, with some guidance	states and prioritizes the main points of research needed to develop a solution to the problem, with minimal guidance
iii. describe the main features of one existing product that inspires a solution to the problem	**6**	The student does not reach a standard described by any of the descriptors		states the main features of an existing product that inspires a solution to the problem	outlines the main features of an existing product that inspires a solution to the problem	describes the main features of an existing product that inspires a solution to the problem
iv. present the main findings of relevant research	**10**	The student does not reach a standard described by any of the descriptors	states the findings of research	outlines some of the main findings of research	outlines the main findings of relevant research	presents the main findings of relevant research

Design Situation: Overview

Monuments are structures (usually statues, plinths, or buildings) that commemorate a notable event, person, or group of people. While **monuments** might be there to celebrate or reflect on an event, a **memorial** is a type of monument made to commemorate a sadder event in history, usually where a person or people have died.

You probably have many monuments where you live, some that you will be aware of and some that you barely notice. You may also have visited them on vacations or learnt about some in your Individuals & Societies classes. Check out **this video** to learn more about what a monument is.

Design Situation: Monuments You've Seen

Which monuments or memorials have you visited?	
What or who did they commemorate?	
What did they look like?	
What impact did they have on you?	

Design Situation: Controversial Monuments

Most monuments are there to help you remember or reflect on an event in history. When visiting you will find people are usually quiet, moving slowly, and spending time in their own thoughts.

Winston Churchill, the former prime minister of the UK is usually celebrated as a leader who led the UK and its allies to victory in WWII. However, if you dig a bit deeper, you will find him to be a controversial character with questionable views on race.

During the Black Lives Matter protests in 2020, Winston Churchill's statue was vandalized. Many people have also called for this statue to be removed.

Design Situation: Controversial Monuments

Choose at least **two** of the following sources to do some further reading about Winston Churchill:

- Racial views of Winston Churchill
- The Dark Side of Winston Churchill
- Winston Churchill: Hero or Villain
- Yes, Winston Churchill is a Racist

After reading, search for images of his statue being vandalized, then answer the questions to the right.

Do you think his statue should be removed or protected? Why?	
Have you heard about any other statues being removed, vandalized, or protested? What do you know about them?	
Do you think his statue could be redesigned to address the protests? How so?	

Research Plan

WHAT DO I NEED TO KNOW?	WHY DO I NEED TO KNOW THIS?	HOW AM I GOING TO DO THIS?	TYPE OF RESEARCH	PRIORITY
Why are monuments created and who or what do they typically commemorate?				
Which event or person would should I commemorate with a monument in the location I have chosen?				
What do other existing monuments look like, what do they commemorate, and how do they function?				

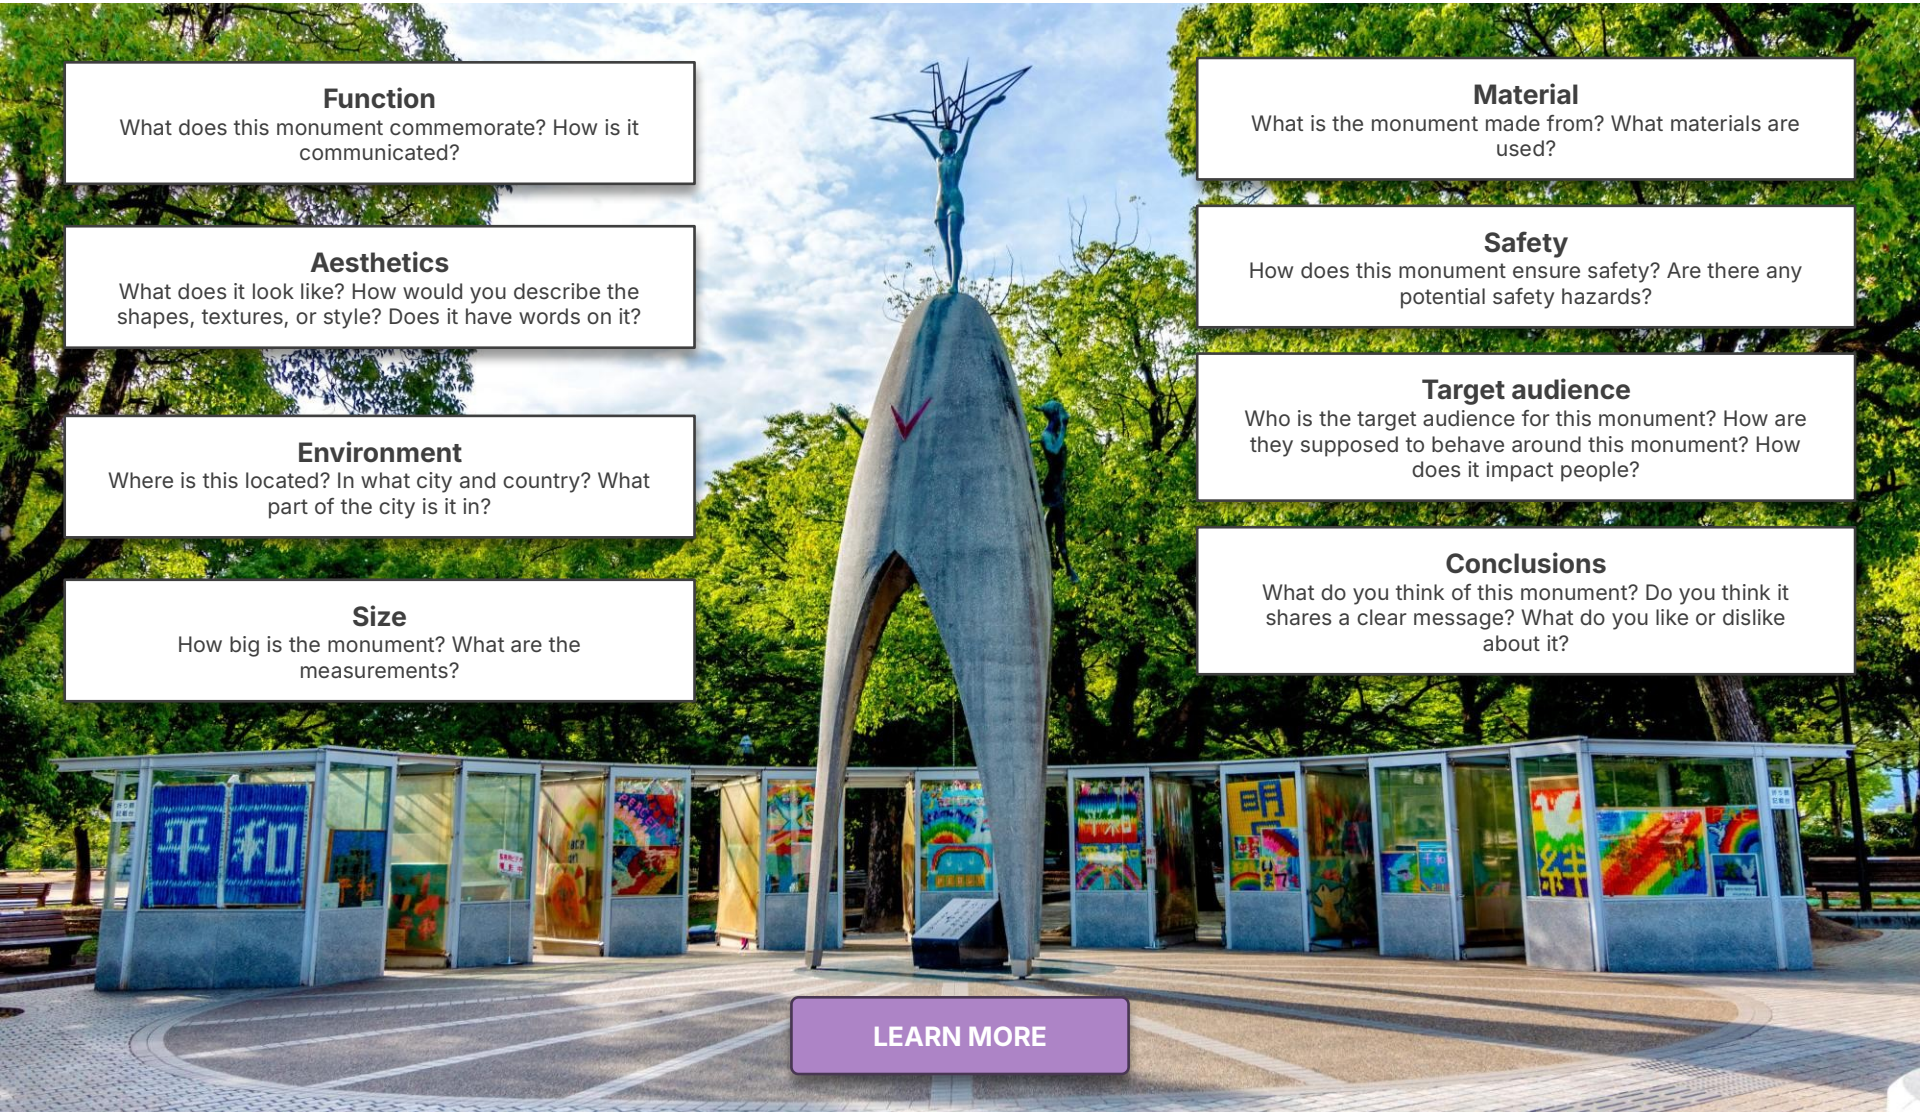

Research Plan

WHAT DO I NEED TO KNOW?	WHY DO I NEED TO KNOW THIS?	HOW AM I GOING TO DO THIS?	TYPE OF RESEARCH	PRIORITY
What facts are important to communicate about my monument and how should I communicate them?				
What tools can I use to create a 3D maquette of a monument and how do I use them?				

Design Situation: Monument Mood Board

Do some research about monuments near you or where you grew up. Copy and paste at least five images of different monuments and include a one or two sentence description about each one.

Research: Existing Design Analysis

Function
What does this monument commemorate? How is it communicated?

Aesthetics
What does it look like? How would you describe the shapes, textures, or style? Does it have words on it?

Environment
Where is this located? In what city and country? What part of the city is it in?

Size
How big is the monument? What are the measurements?

Material
What is the monument made from? What materials are used?

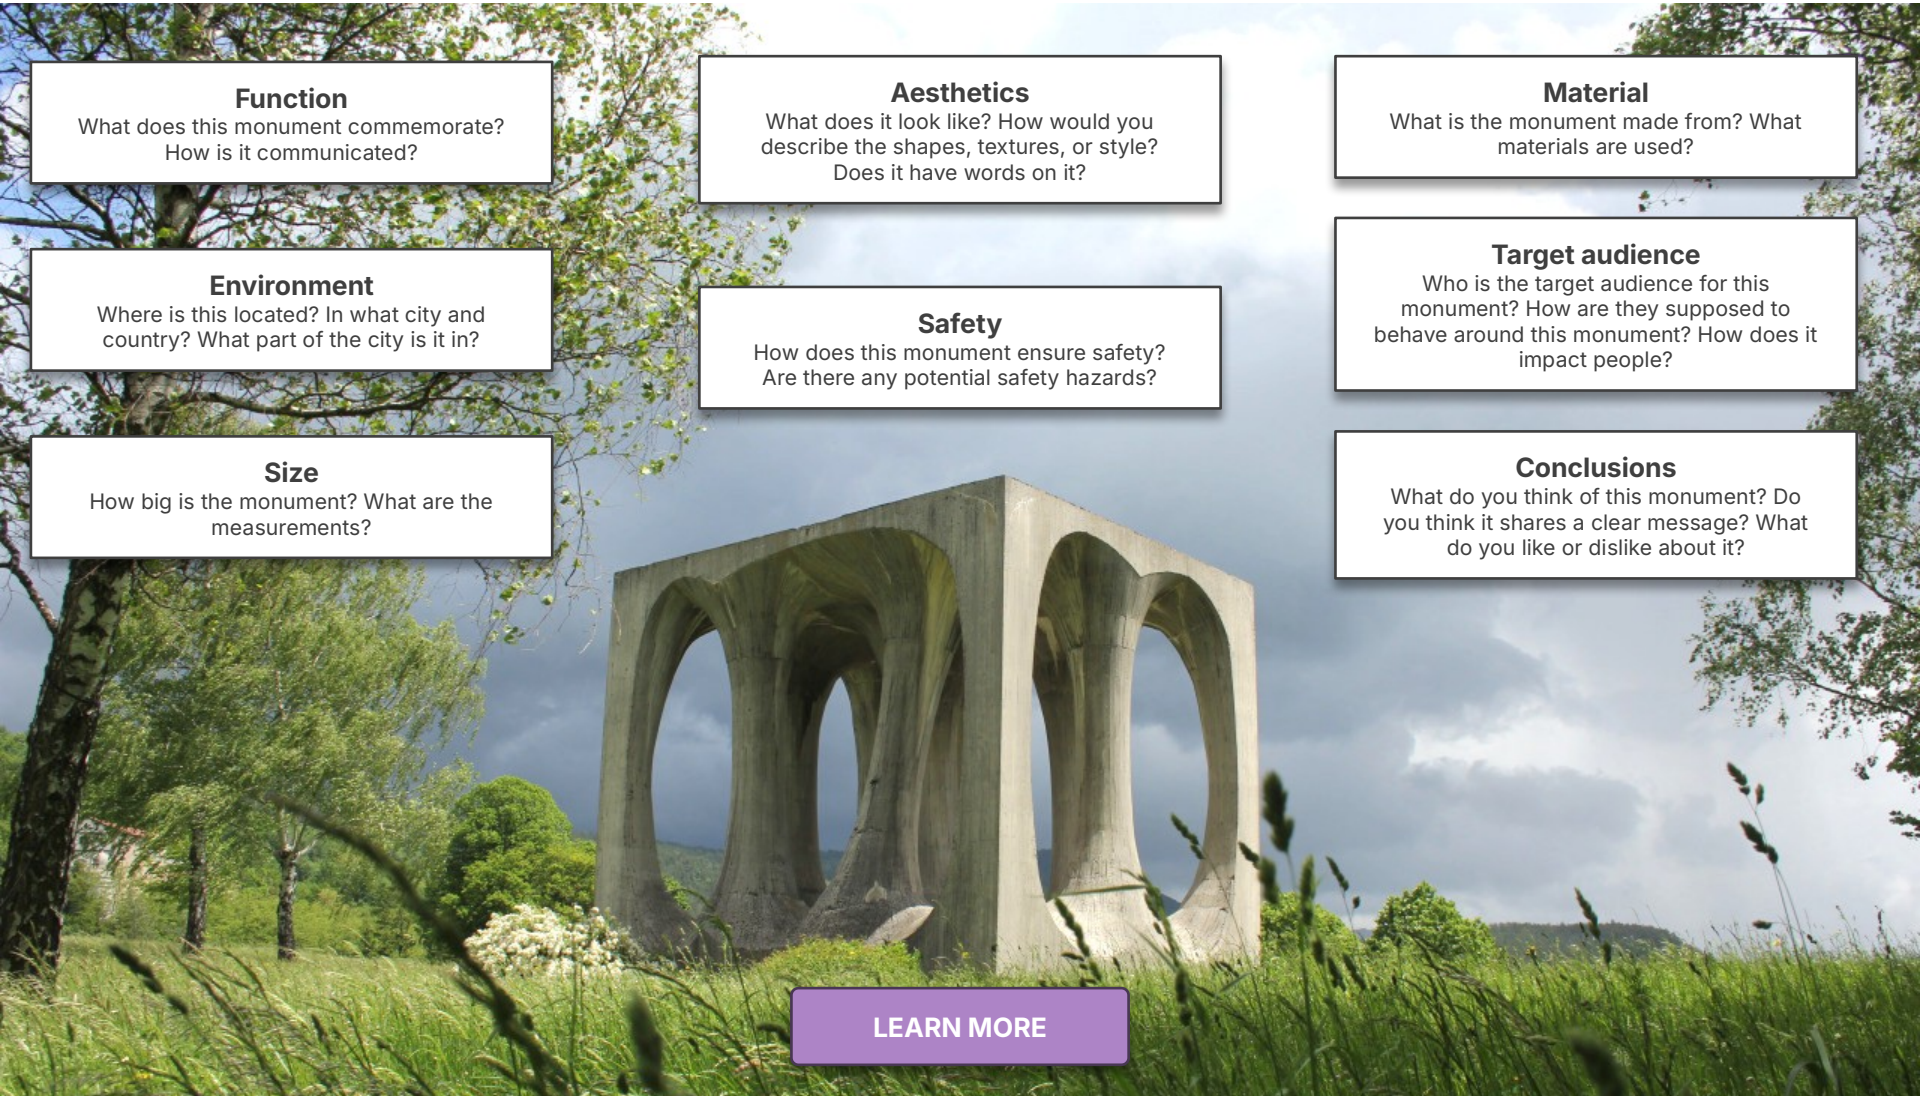

Safety
How does this monument ensure safety? Are there any potential safety hazards?

Target audience
Who is the target audience for this monument? How are they supposed to behave around this monument? How does it impact people?

Conclusions
What do you think of this monument? Do you think it shares a clear message? What do you like or dislike about it?

Research: Choosing a Monument

What will your monument commemorate? A person, people, an event, or something else?	
What facts do you know about this?	
Why have you chosen this?	
Who or what is represented in the monument?	
Where will your monument be placed?	
Why is your monument important for this location?

Design Brief

1. Design Problem:

What is the “problem” you are trying to solve? What is the design situation and your role within it? (2 sentences)

2. Intended Client:

Who are you designing your solution for? What are their characteristics? (3 sentences)

3. Description of Current Market:

What monuments currently exist? Summarize your findings from your Existing Design Analysis (4-5 sentences).

4. Limitations:

What might prevent you from designing the game that you want to? (2 sentences)

Criterion B Mark Scheme

Strands	Slides	0	1-2	3-4	5-6	7-8
i. develop a list of success criteria for the solution	**4**	The student does not reach a standard described by any of the descriptors	states one basic success criterion for a solution	states a few success criteria for the solution	develops a few success criteria for the solution	develops a list of success criteria for the solution
ii. present feasible design ideas, which can be correctly interpreted by others	**5** **6** **7** **8** **9**	The student does not reach a standard described by any of the descriptors	presents one design idea, which can be interpreted by others	presents more than one design idea, using an appropriate medium(s) or labels key features, which can be interpreted by others	presents a few feasible design ideas, using an appropriate medium(s) and labels key features, which can be interpreted by others	presents feasible design ideas, using an appropriate medium(s) and outlines the key features, which can be correctly interpreted by others
iii. present the chosen design	**10**	The student does not reach a standard described by any of the descriptors		states the key features of the chosen design	presents the chosen design stating the key features	presents the chosen design describing the key features
iv. create a planning drawing/diagram which outlines the main details for making the chosen solution	**11**	The student does not reach a standard described by any of the descriptors	creates an incomplete planning drawing/ diagram	creates a planning drawing/diagram or lists requirements for the creation of the chosen solution	creates a planning drawing/diagram and lists the main details for the creation of the chosen solution	creates a planning drawing/diagram, which outlines the main details for making the chosen solution

Impact of the Solution

How well did you meet the design brief?	
What sort of impact do you think a full-sized monument would have on those who saw it?	
Why do you think your monument, and monuments in general, are important?	
Do you think that reflecting on the past is important? Why or why not?	

Reflection

QUESTIONS WE ASKED	ANSWERS WE FOUND	ANY FURTHER QUESTIONS?
Factual: Who is represented in memorials/monuments? What tools can we use to design 3D structures?		
Conceptual: How can designers use their skills to raise awareness about important historical lessons? How can a designer shape the way their target audience feels about their work?		
Debatable: Should we be passive when interacting with memorials and monuments? Should we just forget the past and move on?
