Music Video Project

TGJ2O/3M
Communications Technology
October, 2025

What do you have to do?

In this project, you will work in a small group to plan, film, and edit a short music video.

Your video should tell a clear story or share a clear message. It should look professional, with all shots in focus, smooth editing, and creative use of effects.

Plan Your Video

- Work together with your group to create a short story, message, or concept.
- Decide what shots you will need and who will film, act, and edit.
- Make sure your plan allows every group member to contribute.

Film Your Footage

- Record clear, stable shots.
- Make sure all shots are in focus and well framed.
- Think about camera angles, movement, and lighting to make your video interesting.

Edit your video

- Import your clips and line them up in the correct order.
- Make sure audio and visuals are synchronized (lined up properly).
- Add effects and transitions to support your story — not distract from it.

Export and Submit

- Export your final video as an MP4 file.
- Attach and upload it to Google Classroom.
- Make sure everyone’s name is listed in the group submission.

Reflect

- Fill out the Google Form to reflect on the project
- Did you collaborate well? Did you contribute equally to the project?

Examples

Let’s look at some music videos for inspo.
