Robot Design Proposal

Culminating Assessment
TEJ10Z 01 STEM Robotics
January, 2023

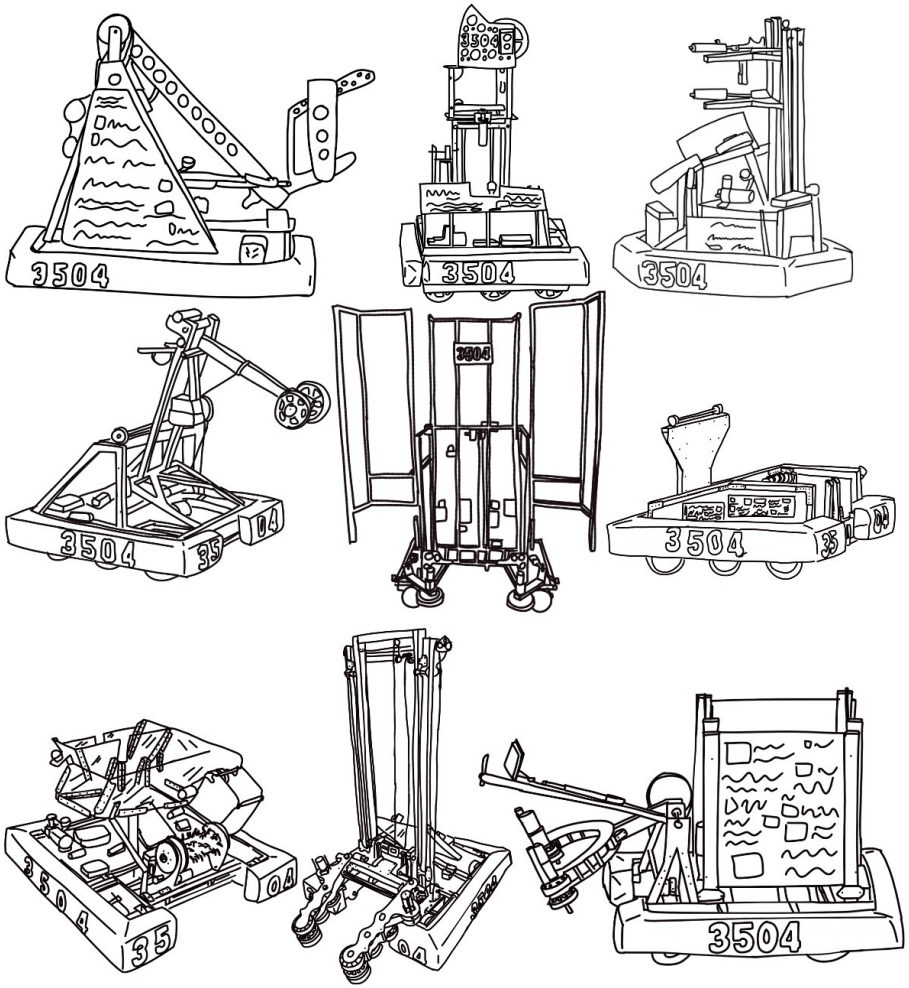

Project description

You will work in an alliance of 3 to come up with a robot design proposal for the 2023 FIRST Robotics Competition. Each of you will design your own unique robot, but it should work in tandem with the other robots in your alliance.

Step 1
Research

- Review the game rules
- Determine your strategy
- Conduct research for inspiration
- Fill out the Google Doc and answer the questions

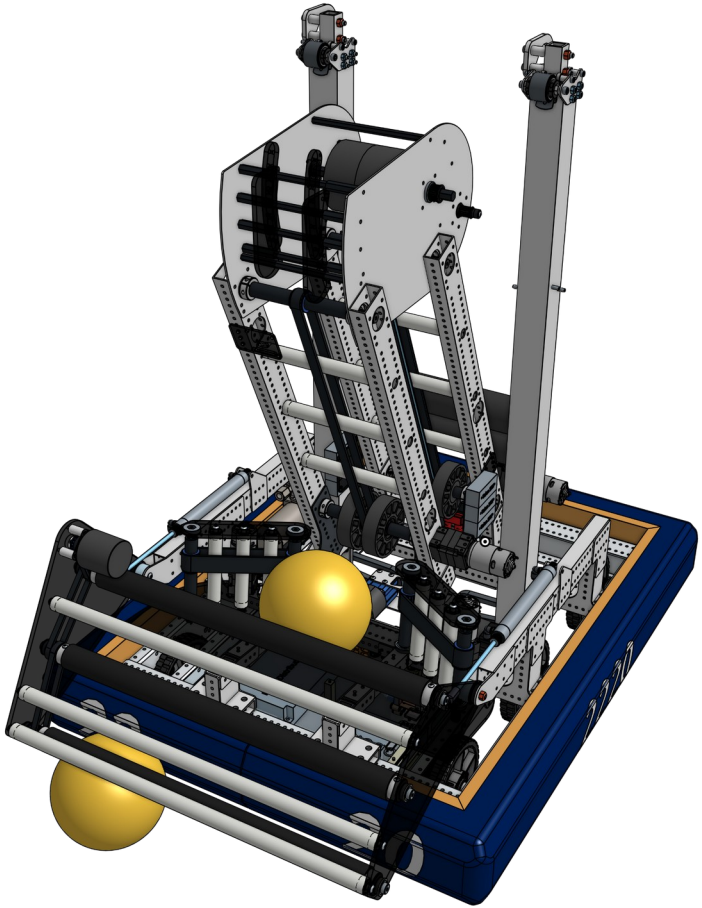

Step 2
Sketches

- Create rough sketches that convey your design ideas
- Should show multiple angles of your robot
- Label parts and draw detailed views where necessary
- Upload images to Google Classroom

Step 3
3D Model

- Create a 3D model of your robot
- Can use either SketchUp or Onshape
- Should demonstrate key components
- Must be to scale

Step 4
Presentation

- Create a 3-5 minute Google Slides presentation about your robot
- Explain your strategy and design decisions
- You will present your proposal to the class on exam day
