# Short Film Project

TGJ2O/3M
Communications Technology
November, 2023

# What do you have to do?

You will apply your video production skills to create a short film. You will work in groups to create a script, design a storyboard, film, and edit a film that is between 2 - 5 minutes in length.

LEARN TO
MAKE
A FILM
IN 8
MINUTES

# Write a script

- Use AI to come up with a script for a topic of your choice
- Did you effectively prompt AI to write a short script?

# Make a storyboard

- Use the template to create an outline for your film
- Does your storyboard give a good outline for your film?

Storyboarding

# Film your shots

- Use a cell phone to film the shots you need in landscape
- Are your shots well-framed and well-lit? Is the audio good?

# Edit your footage

- Use Canva to edit your clips together, add effects, music, etc.
- Is your editing smooth? Do you incorporate text, effects, and music?

# Share your film

- Download or share a link to your film so it can be viewed by the class
- Do you field audience questions to your film well?

# Reflect

- Fill out the Google Form to reflect on the project
- Did you collaborate well? Did you contribute equally to the project?

# Questions?

Use this time to clarify expectations.
