Designing for Well-Being

About this Unit…

INTERNATIONAL COLLEGE SPAIN MADRID
A NORD ANGLIA EDUCATION SCHOOL

Global Context: Scientific and Technical Innovation

How do we understand the world in which we live?

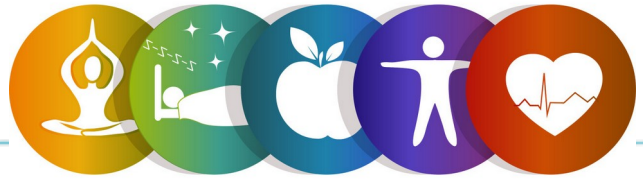

Students will explore the natural world and its laws; the interaction between people and the natural world; how humans use their understanding of scientific principles; the impact of scientific and technological advances on communities and environments; the impact of environments on human activity; how humans adapt environments to their needs.

Key Concept: Development

Development is the act or process of growth, progress or evolution, sometimes through iterative improvements. All ideas need refinement, through development, to become successful, appropriate and feasible. The development of solutions allows problems to be solved with greater success.
Even though the name suggests that the main focus of development would be found in developing ideas, students have to develop research plans as and when they realize that there is further information they need in order to solve the problem. Students constantly adapt and change their plans when creating the solution, dependent on the thoroughness of their planning and, when evaluating, students develop testing methods to assess the success of the solution.

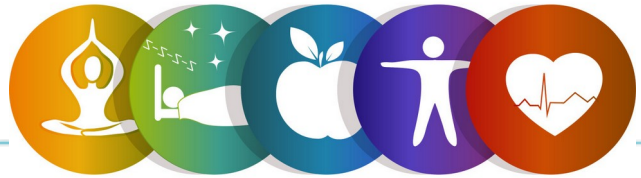

Related Concept: Adaptation

Adaptation involves incorporating ideas found in one product into the development of a new product.

Statement of Inquiry:

Healthy practices can shape well-being

Inquiry Questions to Spark up your ideas...

INTERNATIONAL COLLEGE SPAIN MADRID
A NORD ANGLIA EDUCATION SCHOOL

Factual:

What factors contribute to mental and physical well-being?

What design solutions exist to help our well-being?

What are unhealthy practices?

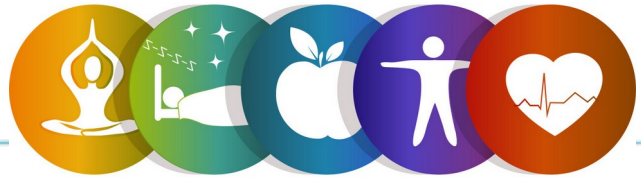

Conceptual:

How can a designer influence positive and healthy behaviour?

What does well-being look or feel like?

Debatable:

To what extent is our well-being at risk in this age of technology?

Suggested by the IB…

INTERNATIONAL COLLEGE SPAIN MADRID
A NORD ANGLIA EDUCATION SCHOOL

You will produce an ePortfolio that follows the design cycle to develop a solution (or range of solutions) which promotes well-being.

You must target one of the following audiences/clients:

- ❑ School students aged 5-9
- ❑ School students aged 10-13
- ❑ School students aged 14-18

Suggested by the IB…

INTERNATIONAL COLLEGE SPAIN MADRID
A NORD ANGLIA EDUCATION SCHOOL

Suggested Design Solutions:

✔️ a digital or physical product to encourage positive practices relating to:

-mental health

-physical health

-social interaction

-sleep

-screen time management

-nutrition

-daily routine

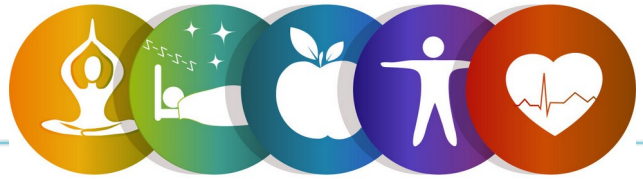

ü a culinary experience (e.g. promoting healthy eating habits)

ü a nutritional dish

ü a fashion article or collection (e.g. integrating ergonomic and comfortable design principles)

ü therapeutic apparel

ü a redesigned commonly used space (public or school) to foster social interaction/physical activity/relaxation

a digital or physical product to encourage positive practices

HYDRATESPARK - https://hidratespark.com/

a nutritional dish

17. Spiced salmon & tomato traybake

This healthy spiced salmon and tomato traybake is quick and easy to make. Salmon is a rich source of the all-important omega-3 nutrient. Omega-3 is an essential fatty acid, which means that the body cannot make it itself so must get it from food sources. Omega-3 has been widely researched for the role it plays in supporting our moods, by having anti-inflammatory effects on the brain as well as healthy neurotransmitter synthesis and communication.

13. Banana oat pancakes

Bananas are super convenient and they contain tryptophan, the precursor to serotonin, our happy hormone. Therefore, including bananas in your diet may help promote a better mood. This banana oat pancakes recipe also contains oats which help to stabilise blood sugars, as well as important mood-boosting nutrients including iron, magnesium and B vitamins.

6. Indian sweet potato & dhal pie

If you're looking for a cheap and easy mood-boosting dinner, look no further than our Indian sweet potato & dhal pie. Packed full of fibre-rich vegetables, this is a great plant-based option. Lentils offer a generous supply of protein, iron and B vitamins which work together to support mood and energy balance. Try serving it with our garlicky greens for added fibre.

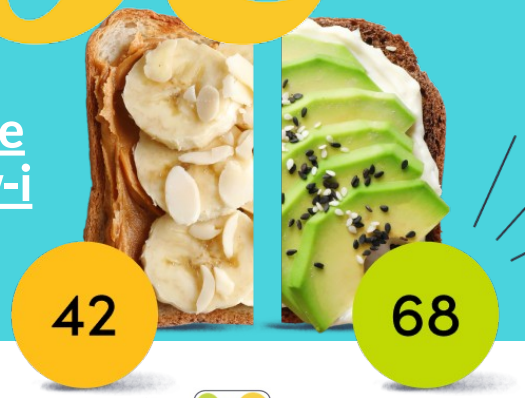

Those looking to improve their mood and give themselves a boost would do well to look at their diet, evidence suggests. It's believed that food choices play a considerable role in our overall mental well-being by helping to reduce stress, ease anxiety and even fight depression. A growing body of research highlights the importance of reducing the consumption of processed foods, such as refined fats and sugars, in place of fresh, wholefoods.

a culinary experience

zoe

https://zoe.com/how-it-works

Complete your tests

Easy, at-home tests give us an inside look at your blood fat, blood sugar, and gut microbiome health.

Get your ZOE Scores

Using your results, we score every food (from 0-100), so you can make better choices of what to eat.

Build new habits

We teach you how to swap, add and combine foods so you can eat in the best way for your body.

Track your progress

Retest your gut to see how your microbiome has improved by following the ZOE program.

★★★★★ Nov 4, 2022

An investment in long term health.

This programme is absolutely worth it. I joined as an investment in my health and so far it's been brilliant. I've learned which foods are good and not so good for my biology and gut and already, 4 weeks in, I have more energy and have started to lose my menopausal weight. Therefore, I can't recommend it enough.

therapeutic apparel

MUSE HEADBAND- https://choosemuse.com/

A personal brain trainer and sleep assistant. Tracks brainwaves and sleep to help improve performance, enhance focus, and optimize sleep.

- Soft fabric headband for day and night use
- Personalized sleep experiences, detailed sleep scores, tracking, and insights
- Brain training biofeedback and curated programs

★★★★★

"As a veteran with PTSD, the headband has been life-changing in its ability to promote calmness, focus, and make me feel present."

Tom

77% felt they had a **better handle on their stress**

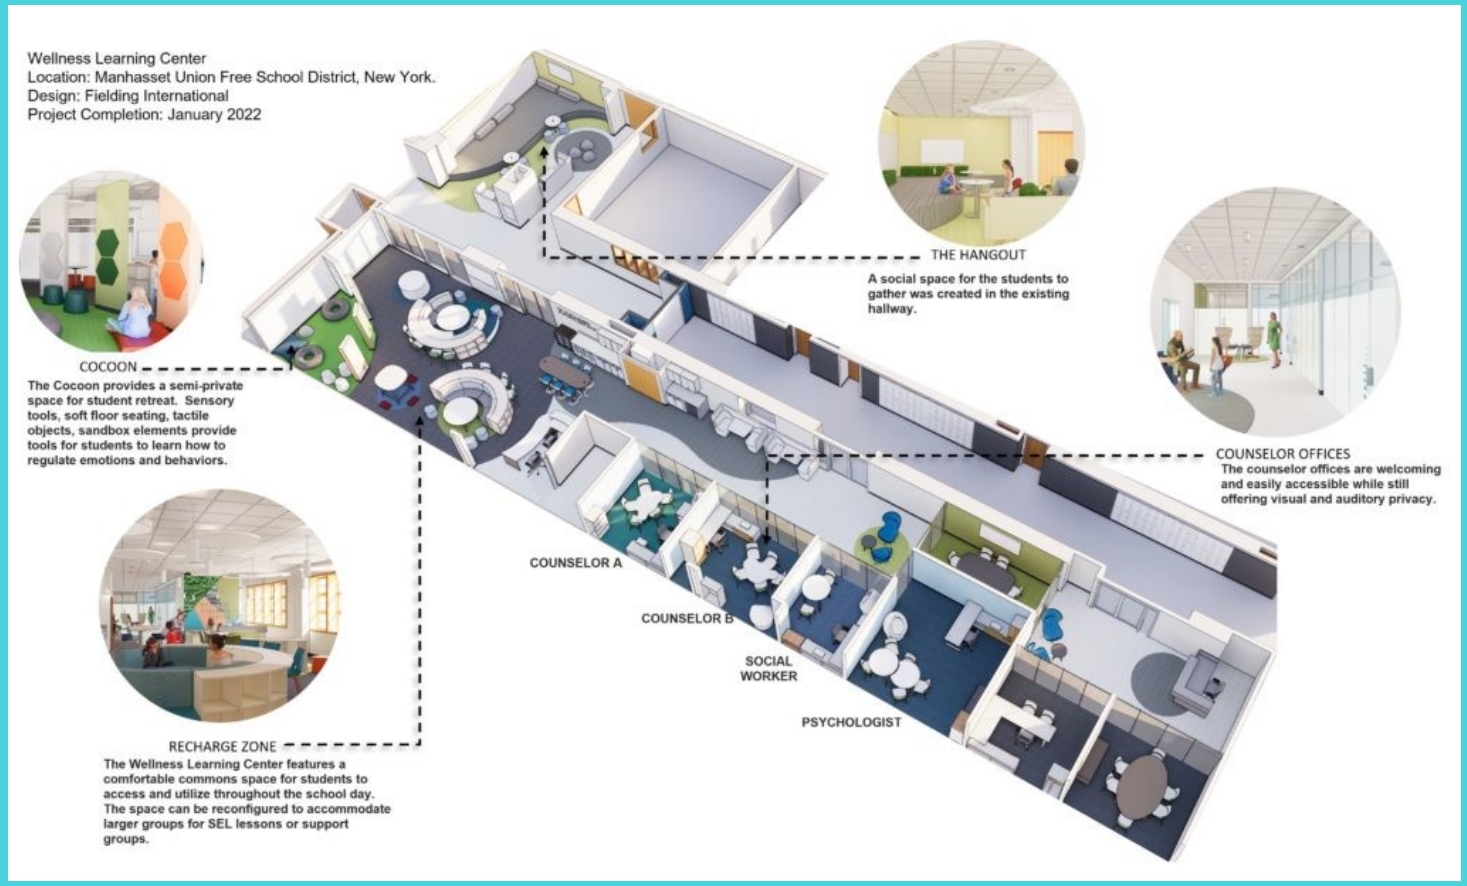

72% reported better **focus & clarity**

78% reported being **more calm & relaxed**

72% reported having **better emotional regulation**

a redesigned commonly used space

...when designing spaces, we also ask the following questions: what kind of atmosphere and environment promotes the desired wellness outcomes, how we can promote cultural practices within these spaces to foster social-emotional wellbeing, and what other resources are needed within our schools and classrooms to promote wellbeing?

Getting Started with A(i)…

INTERNATIONAL COLLEGE SPAIN MADRID
A NORD ANGLIA EDUCATION SCHOOL

Both brainstorming and mind mapping are two effective methods to come up with new ideas and explore them. The main difference between brainstorming and mind mapping is:

- brainstorming helps to generate new ideas
- mind mapping helps to create relationships between ideas.

Create a MIND MAP of the elements you should identify to start with A(i)

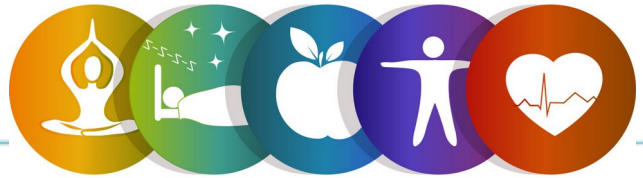

Avoid :

- The need to determine a product/specific solution

Aim to :

✔Communicate understanding of the design challenge and design approach (context)
✔Identify research needed to support your explanation of the problem
✔Identify your Target Audience from the given options

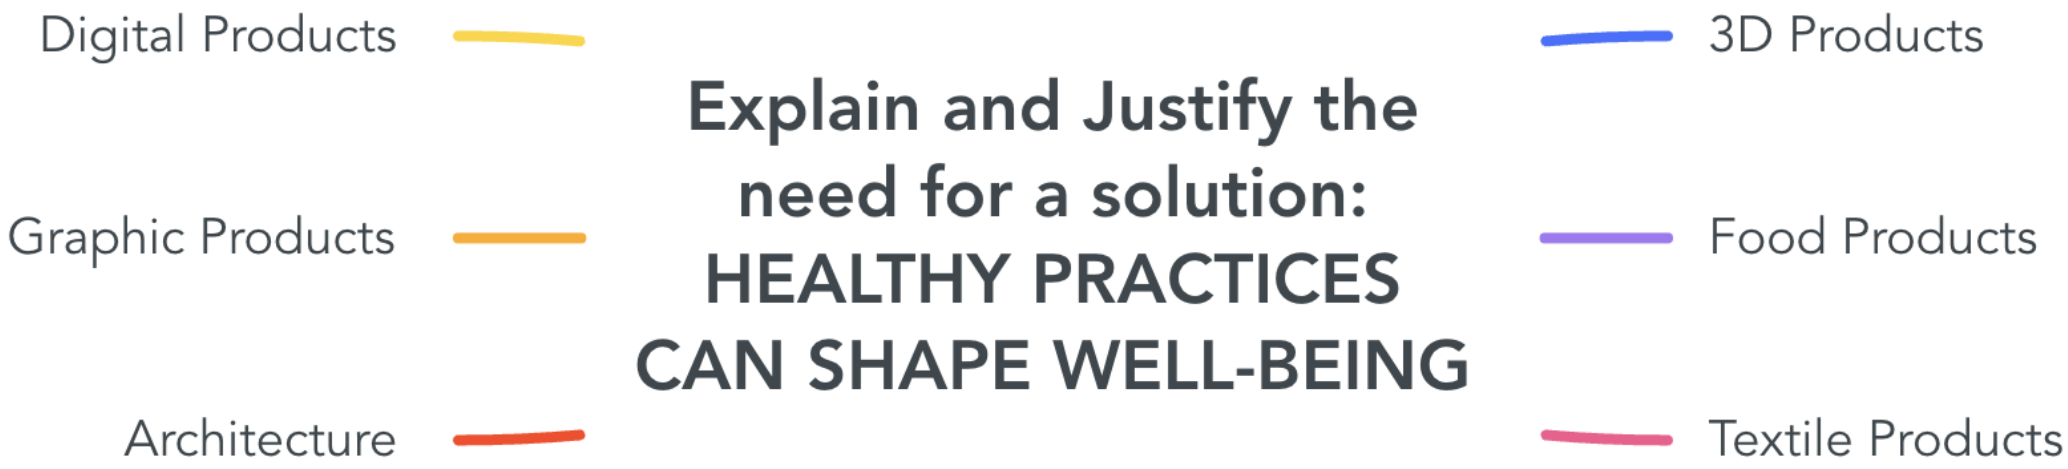

You should be laying out the path for the start of your inquiry process

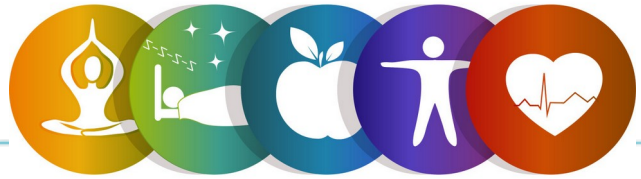

Getting Started with A(i)…

INTERNATIONAL COLLEGE SPAIN MADRID
A NORD ANGLIA EDUCATION SCHOOL

Create a mind map around the different potential design contexts that you could go into. The more areas you explore, the more critical thinking you are demonstrating!

Getting Started with A(i)…

INTERNATIONAL COLLEGE SPAIN MADRID
